

How to find out, which firmware is installed on your EFOY Pro fuel cell

The remote control displays the current status and is used to control the EFOY Pro.

EFOY Pro 800 / 800 Duo / 2400 / 2400 Duo / 12000 Duo

Press ▼ one time to obtain information on the installed firmware of your EFOY Pro fuel cell. In the third line, as shown in the image, you find the current installed firmware version.

EFOY Pro 600 / 1200 / 1600 / 2200 / 2200 XT

Press (>>) three times to obtain information on the installed firmware of your EFOY Pro fuel cell.

In the text of the second line, as shown in the image, you find the current installed firmware version.

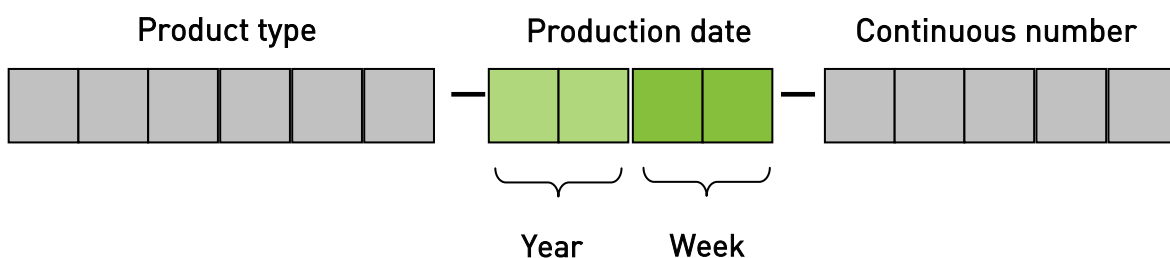

Here for example V06 11.09XT12V/24V. The installed firmware version on the EFOY Pro 2200 XT is 11.09.

Press (>>) one more time to obtain the serial number of your EFOY Pro fuel cell.

Serial number

The serial number of your EFOY Pro fuel cell gives you information about the production date and firmware version. The serial number is also available on the specification plate of the EFOY Pro fuel cell.

For example the serial number is 250617-1152-25641. The production date was in calendar week 52 2011 (11 52). The installed firmware is 11.09 (V06 11.09XT12V/24V).

Which update is relevant for your EFOY Pro fuel cell

For better understanding, which update is relevant for your EFOY Pro fuel cell, SFC gives you a historical overview of the produced systems, installed firmware and production date.

Overview

- **EFOY Pro 12000 Duo**
FW 19.09
Available Update: Firmware 19.10
- **EFOY Pro 800 / 800 Duo / 2400 / 2400 Duo**
FW 17.06 to 17.09
Available Update: Firmware 17.10
- EFOY Pro 600 / 1200 / 1600:
Production date before calendar week 12 2011 - FW 9.09 to 9.23
Available Update: Firmware 9.27
- EFOY Pro 600 / 1600:
Production date after calendar week 12 2011 - FW 11.07 to 11.09
Available Update: Firmware 11.13
- EFOY Pro 2200 / 2200 XT:
FW 11.04 to 11.10
Available Update: Firmware 11.13

EFOY-Updater

Since the introduction of the EFOY Pro fuel cell on the market, SFC develops and optimizes the charging strategy and internal processes to make the fuel cell more effective, ecological and improve the quality. Due to that, firmware updates are published to bring older units on state-of-the-art of science and technology.

SFC offers a free service, to provide the costumers a simple and cost free solution, to keep the EFOY Pro fuel cells up to date. The EFOY Pro is easily updated, without complications. Simply connect the EFOY Updater to the EFOY Pro fuel cell and the update runs automatically. Request the EFOY-Updater for free.
